# Bonisa recap and analysis

Monday 19 October 2026. Event: Saturday 14 November 2026 (26 days away).

## The headline

Bonisa is strong on people and content, and blocked on money, paperwork and security. Artists are being gathered and the brand story is ready, but a client cannot safely book and pay yet, and no legal documents exist. Almost everything blocked runs through one person, Haiden.

## Where each area stands

Items marked (you) were reported by Alwande on 12 October and may have moved. Items marked (code) were checked in the repository.

| Area | Status | Notes |
|---|---|---|
| Product, this repo | Built, not proven live | Verification gate, 18/82 split, escrow, owner area and complaints exist in code (code). Typecheck passes with zero errors. No automated tests. |
| Haiden's version | Unaudited | A copy of this repo that he upgraded. Not yet seen. Questions are with him. |
| Security | Needs work | Weak password storage, tokens that never expire, no login limits, open cross-site access, unchecked upload types (code). |
| Payments | Blocked | Peach has not confirmed. The code is Stripe only, with no Peach work (code). |
| Legal and POPIA | Not started | No privacy policy, consent or contracts. Alwande and Haiden agreed to draft together. |
| Bank and entity | Open question | Opus Intelligence is the owner. Unclear whether registering under Bonisa means a trading name or a separate company. |
| Artists | In motion (you) | Intake checklist, game and questionnaire out, with responses back. Founding 50 WhatsApp group in progress. |
| Show Me Girl | Design stage | Balissa briefed (you). Script drafted. Credit type and levels undecided. |
| Event | Dates set | 14 Nov. Details from Favour awaited. Plan: awareness launch for now. |
| Countdown | Pending (you) | Last known status. |

## What is decided

- Event date is Saturday 14 November.
- Peach replaces Stripe.
- Legal documents are a joint job between Alwande and Haiden.
- Amali is a helper, not an employee, working on content.
- Tier names approved: Rising, Established, Trusted, Elite.
- Both app versions are live.

## The analysis

**1. One bottleneck.** Legal, the bank account, Peach, the security fixes and the which-version decision all sit with Haiden. This week is about getting firm answers from him.

**2. One side of the marketplace is ahead.** Supply (artists) is moving. Demand (paying clients) is not, because payment is blocked. An awareness launch is the safe call: artists apply, clients join a waiting list.

**3. Security before scale.** Collecting ID documents and bank details on weakly protected logins would be a real exposure. The intake page avoids ID and banking, which is right. Fix passwords and tokens before verification opens to many people.

**4. Money comes from the 18%.** Show Me Girl credit and ambassador pay come out of Bonisa's 18% share. Test the numbers before promising amounts.

## Dates at risk

| Date | Deadline | Days away | Risk |
|---|---|---|---|
| Mon 2 Nov | Legal live in the app | 14 | High. Not started. |
| Fri 6 Nov | Real payment tested end to end | 18 | High. Depends on Peach. |
| Mon 9 Nov | 30 verified artists bookable | 21 | Medium. Needs a working flow and enough applicants. |
| Sat 14 Nov | Event | 26 | Awareness launch unless all gates are green. |

## Biggest risks, in order

- No legal or POPIA documents before real artist details are collected.
- Weak login security in an app that will hold ID and bank data.
- Payments with no firm date.
- Two versions of the app drifting apart.
- Unclear entity and bank structure, which could delay Peach further.

## Signal and noise this week

**Signal:** firm answers from Haiden and Peach, legal drafting, artist verification, security fixes.

**Noise:** model portal, mobile app, new tiers, wig ecosystem, extra features.

## This week, by owner

| Owner | Actions |
|---|---|
| Alwande | Message Peach for a firm date and the exact papers needed. Decide trading name versus separate company. Tell Favour the event is planned as an awareness launch. Finish the WhatsApp group using invite links. |
| Haiden | Answer questions about his version and database. Agree who drafts legal and by when. Say which version is the main one. |
| Claude, on request | Write the Peach and Favour messages. Plan the security fixes. Summarise the questionnaire. |

## Open questions

- Does registering under Bonisa mean a trading name or a separate company?
- Which app version is the main one?
- Is Show Me Girl credit cash, points or a service discount, and how many levels?
- Is the countdown done yet?
